WORKBOOK — SECTION SEVEN

Designing Your Teams, Tools, and Human-AI World

Use this section to design the world around the learner, not just the information in front of them.

Tool and Template Inventory

32. List 3-5 practical tools, templates, or supports in your system. What does each one help the learner build, decide, or navigate?

Stakeholder Map: This tool helps people see who is doing the work, who is affected, and who has the power to make final

___ Decision Routing Template: This template helps the team figure out who needs to be asked and sends recommendations to the right project sponsor.

___ Read-Only Record Export: This tool gives technical experts safe access to system logs so they can check data without breaking anything.

___

Shift-Aligned Check-In Schedule: This tool helps the team work around different shift times so night-shift workers can share their thoughts.

Identity and Role Support

33. Write 3 identity-building questions that help learners discover what they bring to the work.

1.What daily shift tasks do you do that daytime meetings might miss?

What technical limits do your logs show so we do not guess the wrong cause?

What official approval rules do you manage before this workflow can change?

CAT Tokens and Milestones

34. What milestones deserve a marker, badge, title, or visible proof of growth?
